

Harshit Kushwaha

SUMMARY

+91-7409064489 | find.harshitt13@gmail.com | harshitt13.in | linkedin.com/in/harshitt13 | github.com/harshitt13

Computer Science undergraduate and active open-source contributor to CNCF and the Observability ecosystem, focused on systems-level tooling in Go, Java, and Dart. Builds robust Full-Stack and ML/AI projects end-to-end, from designing data ingestion pipelines to deploying scalable applications. Passionate about experimenting with advanced AI agent tooling and delivering high-performance software solutions.

WORK EXPERIENCE

Member

Jul 2026 – Present

OpenTelemetry, Remote

- Contribute to OpenTelemetry Collector Contrib and Java Contrib, fixing bugs and improving telemetry infrastructure across multiple receivers and components. Trusted as a triager for the OpenTelemetry Dartastic SDK and API, reviewing issues and pull requests to maintain code quality and project health. Collaborate with a global open-source community on systems-level Go and Java development for observability tooling.

AI Trainer

Nov 2024 – Dec 2024

Outlier AI, Remote

- Evaluated and ranked LLM-generated responses for correctness, reasoning quality, and safety on coding/technical prompts. Delivered structured feedback that fed directly into model training data, improving output accuracy on technical tasks.

OPEN SOURCE CONTRIBUTION

OpenTelemetry

opentelemetry-collector-contrib:

- Reliability: retry & queueing logic (#48055); Windows PDH transient-error handling across receivers (#49544).
- Feature work: Oracle DB PDB auto-discovery & multitenant CDB receiver (#48712); elasticsearch exporter data_stream.type values (#49821); configurable log format (#48053); STS auth for Alibaba Cloud Log Service (#48707); nested NOT policy support (#47382); excluded-collector query support (#47381).
- Infra & testing: promoted Kubernetes feature gates to beta (#48629); expanded YANG-gRPC receiver test coverage (#48730).

opentelemetry-java-contrib:

- Queue-manager uptime reporting (#2835); standardized metric unit from 'microseconds' to 'us' (#2887).

Meshery

meshery:

- Fixed missing paths and restored lightbox functionality in meshery (#17747, #17759).

meshery-extensions/kanvas-site:

- resolved semantic HTML, accessibility warnings, & improved SEO score (#135, #136).

PROJECTS

NyxChat

GitHub

A privacy-first peer-to-peer messaging application. By leveraging BLE mesh networking and end-to-end encryption, it eliminates the need for central servers, ensuring your data stays yours—even in off-grid environments.

Krtrimahastah

GitHub

Open-source, low-cost prosthetic arm bridging the gap between expensive bionic limbs and passive cosmetic devices; a fully functional, multi-modal assistive device for under \$100 USD. Achieved 5 degrees of freedom (5-DOF) in the prototype hand.

Netra

GitHub

AI platform to detect suspicious and complex money-laundering patterns using hybrid risk scoring. Built a CSV ingestion pipeline with an Isolation Forest model for anomaly detection, Gemini API for automated risk summaries, and Neo4j for graph-based transaction visualization.

Hybrid Stock Market Prediction Model

GitHub

An open-source quantitative forecasting engine. Features a PyTorch Time-Series Transformer, Bayesian architecture optimization, and dynamic Volatility-Aware (VIX) Meta-Learning.

TECHNICAL SKILLS

- Programming:** Python, JavaScript, Typescript, HTML, CSS, C/C++, GoLang, Dart, Java
- Libraries/Frameworks:** TensorFlow, Keras, PyTorch, Scikit-learn, OpenCV, Seaborn, React.js, Next.js, Flask, FastAPI, Selenium, SQL, Neo4J
- Tools:** Git, GitHub, Docker, WSL, Development Boards, WordPress, Firebase, Figma, Fritzing, GitHub Copilot, Google Antigravity, Affinity, Vercel, Postman, Google Cloud Console, Google AI Studio, Arduino IDE, Claude Code, OpenTelemetry

ACHIEVEMENTS

- Finalist at CIIS National CyberShield Hackathon 2025 among 1100+ teams.
- Top 1% ranking in MLH Global Hack Week: Cloud Week 2024.

EDUCATION

VIT Bhopal University, Bhopal

2027

B.Tech in Computer Science

CGPA: 8.16

CERTIFICATIONS

- Inclusive Open Source Community Orientation — *Linux Foundation*
- Certified Meshery Contributor — *Meshery - CNCF*
- Deep Learning with Keras and Tensorflow — *IBM*

EXTRACURRICULAR ACTIVITIES

- Tech Team Core Member**, Software Development Club VIT Bhopal Nov 2024 – Aug 2025
- Club Member**, GeeksforGeeks Club VIT Bhopal Mar 2024 – Jun 2024
